Intertek is a global company with over 130 years of expertise in quality assurance, offering inspection, testing, certification, and auditing services to help ensure products, processes, and systems meet international standards. Our goal is to bring quality, safety, and sustainability to everyday life.

Industry Services Mexico

INFRASTRUCTURE - MEXICO

Industry Services specializes in end-to-end construction project management, serving as an independent third party to ensure regulatory, technical, and contractual compliance throughout the project life cycle—from the engineering phase through commissioning.

Our services support residential, commercial, and industrial projects in the private sector, as well as public-sector infrastructure projects.

Industry Services Mexico stands out as a trusted partner for project management, construction oversight, and process quality assurance and control—bringing transparency, reliability, and credibility to developments through international standards and industry best practices.

Application Segments

Services are designed for a wide range of infrastructure sectors, including:

- Airports
- Railways
- Roadways
- Ports and Marine Terminals
- Energy (Generation and Distribution)
- Oil and Gas
- Mining
- Buildings
- Housing
- Water and Sanitation

Objectives

Infrastructure management services are designed to:

- Build trust and transparency in projects with investors, authorities, and stakeholders (interested parties)
- Enhance technical quality from the planning stage through execution
- Reduce financial and technical risks
- Provide greater assurance in meeting schedules and budgets
- Streamline validation processes and the release of funds
- Ensure optimal conditions for operating and maintaining the facilities

Competitive advantages

- Significant risk reduction for investors and insurers
- Greater project credibility and reliability
- Multidisciplinary team with experience in complex projects
- End-to-end technical oversight: physical progress, variances, documentation, and changes
- Streamlined financing processes and improved access to capital

Building and Construction

Intertek's Building & Construction brings together leading brands across architecture, engineering, and construction to deliver and develop innovative solutions for products and projects. This division offers specialized services such as:

- Geotechnical engineering
- Construction materials testing
- Building science solutions
- Industrial hygiene
- Advanced geophysical engineering
- Environmental consulting
- Specialized testing and engineering

EXPERIENCE

We've built a strong global track record as strategic partners, delivering high-impact projects that ensure efficiency, technical safety, and operational quality. Throughout our journey, we've contributed to flagship initiatives across key industries, creating value through accurate assessments, innovative methodologies, and a continuous-improvement mindset.

Services

We provide a team of technical specialists with extensive construction experience, focused on supervising, inspecting, and signing off on construction processes to ensure quality assurance and quality control, in full compliance with applicable standards and current regulations.

Our services include:

- Verification and validation of construction progress
- Control and tracking of changes throughout construction execution
- Oversight to ensure designs, technical specifications, and quality procedures are followed in the field and in fabrication shops
- Review and control of progress estimates for payment processing and document support
- Volume quantification and review of quantity takeoffs
- Tracking the construction execution schedule
- Contractor audits and quality control for construction processes

PROJECTS

Paticajo Industrial Center Expansion (ACIP)

Client: Consorcio Minero Peña Colorada

Execution period: February 2023 – May 2025

Contract: 4600003549

Scope: Oversight and inspection to ensure and control quality, volume takeoffs, and review of quantity calculations for a new tailings filtration plant

Disciplines: Preliminaries, Civil Works, Steel Structure, Piping, Tanks, Mechanical Equipment, Electrical Equipment, Electrical Installation, Hydraulic Installation, and Architectural Elements

Dry Stack (Dry Stacking System)

Client: Consorcio Minero Peña Colorada

Service period: March 2026 – ongoing

Contract: 4600005889

Scope: Quality control, volume quantification, and discipline-specific inspections during construction of a Dry-Stack area for mine tailings disposal, targeting the lowest possible moisture content

Specialties: Earthworks, Site Preparation, and Civil Works

Mining Facilities Revamp

Client: Consorcio Minero Peña Colorada

Service period: March 2016 - June 2018

Contract: 4600000154

Scope: Work quantity takeoffs and quality inspections throughout construction processes

Specialties: General Construction Coordinator, Civil Works, Mechanical Equipment, Equipment Electrical and Instrumentation

Paste Plant

Client: Consorcio Minero Peña Colorada

Service period: June 2018 - July 2019

Contract: 4600000658

Scope: Work quantity takeoffs and quality inspections throughout construction processes

Specialties: General Construction Coordinator, Civil Works, Mechanical Equipment, Equipment Electrical and Instrumentation

New Mobile Maintenance Workshop

Client: Consorcio Minero Peña Colorada

Service period: August 2021 - May 2023

Contract: 4600002437

Scope: Work quantity takeoffs and quality inspections throughout construction processes

Specialties: Civil Works, Structural, Quality, Electrical Works Certifier, and Works Coordination Management and Works Control

Guasimas Dam Reinforcement

Client: Consorcio Minero Peña Colorada

Service period: May 2023 - December 2025

Contract: 4600004877

Scope: Volume certification for the reinforcement of the North Embankment, Southeast Embankment, and Diversion Channel.

Specialties: Construction Management & Control Coordinator, Civil Works Certifier, and Earthmoving

Ternium Pesquería New Steel Mill

Client: Ternium Mexico

Service period: June 2023 - ongoing

Contract: 6700325008

Scope: Specialized coordination, supervision, and works inspection services

Specialties: Construction Coordinator, Field Engineer, Engineering Designer, Materials Supply Coordinator, Certification Analyst, Expeditor and Materials Logistics Coordinator, Project Scheduler, Capital Cost Analyst, Structures Administrator, Quality Inspection Engineer, Work Volume Measurement Engineer, Work Progress Verification Engineer, Safety Specialist, and Administrative Assistant.

Specialized Supervision Services

Client: Tenaris Tamsa - Technical Directorate

Service period: July 2023 - ongoing

Contract: 6700327298

Scope: Specialized services for oversight and management of construction works and electromechanical installation across various industrial plants within the Group

Specialties: Construction Supervisor in Basic/Intermediate/Advanced Electromechanics, Construction Supervisor in Basic/Intermediate/Advanced Architecture, HSE Supervisor, and Construction Administration Supervisor
